CW Industries has a complete range of Push Button switches that are universally specified across many industries including consumer electronics, appliance, telecommunications, lawn and garden, instrumentation, automotive, medical and more. Our GPB series switches are used in both low voltage and high voltage applications that require high performance, repeatability, long electrical life and crisp actuation.

Agency approvals include UL, CSA, VDE, ENEC and all CW rocker switches are RoHS compliant.

In addition to our standard product offering, we supply custom switches for mid to high volume production requirements. We offer total development and manufacturing support as our design teams transform your ideas into prototypes and test them in our UL, CSA and DOD-certified laboratory.

All CW Push Button Switches are RoHS compliant and available in both illuminated and non illuminated versions with various termination, mounting and functions.

Specify CW Products when your application requires innovation, high quality and superior performance.
