## FEATURES

- Sealed bushing
- Current rating versatility
- 1 and 2 pole circuitry
- Non-teasible mechanism for all but center "ON" circuits
- Dry circuit (logic level loads) to power switching levels
- Wiping action contacts
- Positive make and break action
- Small and large size bushings and Actuator
- Solder lug terminals
- Also available with locking Actuator, integrated wire termination and printed circuit board terminals.

## SPECIFICATIONS

- Bushing seal or bonded seal per MIL-S-8834
- MS approved and OPL'd to MIL-S-8834
- Temperature range: $-67^{\circ} \mathrm{F}$ to $+160^{\circ} \mathrm{F}$
$\left(-55^{\circ} \mathrm{C}\right.$ to $\left.+71^{\circ} \mathrm{C}\right)$
- Life: 20,000 operations at rated load 40,000 operations mechanical life
- "O" ring panel seal on $1 / 4$ " - 40 type bushing size
- Solder lug terminals . 050 [1,27] dia. hole

## CAUTION AND RECOMMENDATION FOR CLEANING AND SOLDERING

Contamination of the contacts of miniature switches is the most common cause of problems in low energy circuits, resulting in the inability of current to flow through the increased resistance of the switch contacts. As most contamination occurs during the installation and cleaning of the switch, proper care when installing the switch can reduce problems in this area. The following procedures should be followed to reduce the possibility of switch contact contamination.

## Hand Solder

1. Use rosin core solder .030 "-. 040 " diameter.
2. A small soldering iron in the 30 to 40 watt range should be used.
3. The solder joint should not be overheated.
4. Do not position switch with terminations straight up.
5. No clean up should be necessary. However, if used, do not allow solvents to enter non-sealed areas of switches.

## Wave Solder - Miniature Switches

Do not immerse or spray with solvents to remove flux except for switches designed for this type of cleaning. The use of wave solder oil is not advised.
